

MEMORY FOAM INSOLE

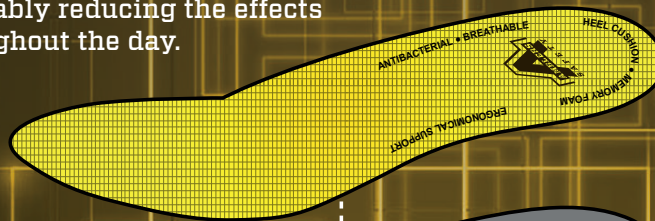

NEW IN A/W 15

Cushioning technology that supports and flexes in key areas of your foot providing impact relief and superior comfort.

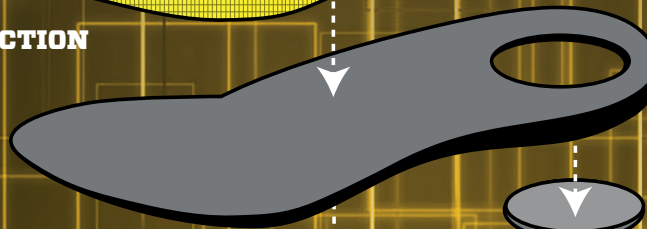

ERGONOMICAL SUPPORT

Technically designed with targeted cushioning at pressure points that contour to the natural shape of the foot, considerably reducing the effects of foot fatigue throughout the day.

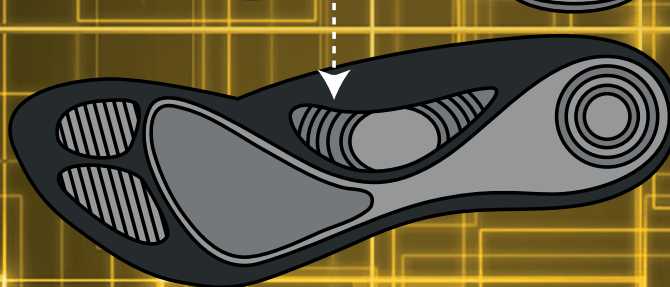

ANTISTATIC PROTECTION

Helps reduce and eliminate natural static charge.

ANTI-SLIP MESH

Anti-slip mesh lining reduces the risk of blistering from rubbing and slipping inside footwear.

ANTIBACTERIAL

Built in antibacterial technology reduces odours and prevents bacterial and fungal growth in footwear.

FOREFOOT PAD POINTS

Built in 3mm pads offer impact relief and flexibility at the forefoot.

BREATHABLE

Specifically designed lining wicks moisture away from within the footwell allowing feet to breathe.

HEEL CUSHION

Memory foam heel absorbs energy on impact improving the athletic performance throughout tough working environments.

These insoles are suitable for use in boots meeting EN ISO20345:2011 safety standard.
